### MARKET OPPORTUNITY

Skin rejuvenation is one of the leading growth drivers in aesthetic medicine.

:: Over nine million procedures are performed each year, generating more than four billion dollars in fees for physicians.

:: The category is forecasted to grow to 11 million annual procedures within five years.

### Answering a need in aesthetic medicine

Other CO<sub>2</sub> lasers require you to change handpieces, which can lengthen your procedure time. But SmartSkin enables you to:

- Customize your treatment parameters for fractional ablative skin resurfacing
- Effectively treat deep wrinkles and other problem areas with new MultiPulse Intelligent Delivery
- Efficiently treat your patients quickly and without the need for costly disposables

# Putting the most advanced features in your hands

## 1 Unmatched Versatility

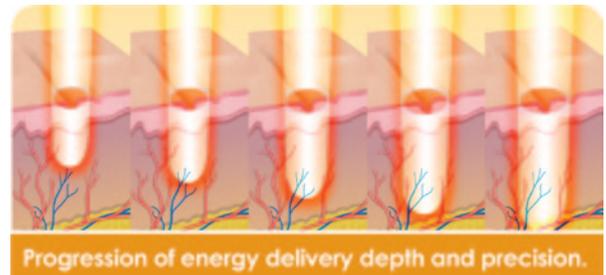

Customize treatments to meet your patients' cosmetic goals and downtime needs.

SCANNING SHAPES	SCANNING SIZES	SCANNING PATTERNS TO 30W	DWELL TIME OPTIONS	DENSITIES

All in one easy-to-use workstation.

## 2 New! MultiPulse Intelligent Delivery

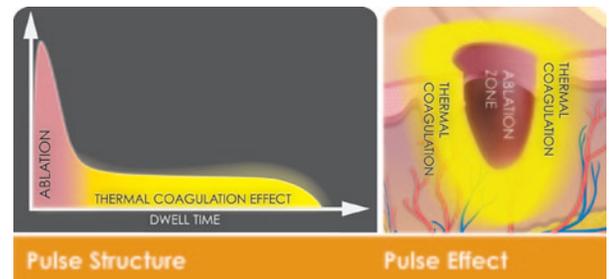

Adjustable depth of penetration up to 2 mm for treatment of deep wrinkles and problem areas.

## 3 Unique Pulse Structure

Specifically designed to optimize thermal coagulative zones, the foundation of neocollagenesis and fast healing.

- First phase—delivers high peak power for rapid ablation and minimization of erythema
- Second phase—provides adjustable dwell time, optimizing energy delivered to the thermal coagulation zone providing tissue coagulation resulting in new collagen

## 4 Intelligent Scanning

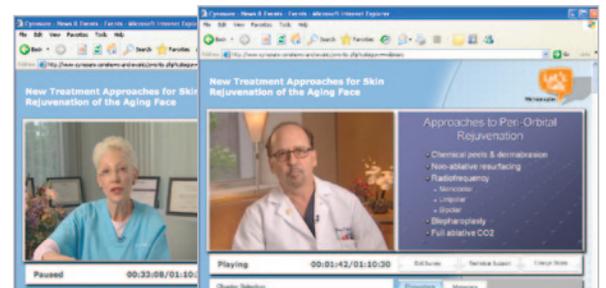

Provides three approaches to help you minimize collateral energy.

## 5 Ongoing Clinical Education and Marketing Support

Cynosure offers educational webcasts about new applications, live Q&As with leaders in the field and other continuing clinical support.

Full marketing support is also available patient brochures and e-newsletters, ad files, PR, and exclusive consumer online partnerships.
